

# DSO Technology Integration **CHECKLIST**

## System Standardization

- Are all locations operating on the same PMS platform
- Are imaging systems standardized across practices
- Are reporting and data integrations consistent

## Network Infrastructure

- Can each location support cloud-based applications
- Is bandwidth sufficient for imaging and digital workflows
- Are firewall and network configurations aligned

## User Access & Security

- Is there a standardized user provisioning process
- Are role-based access controls implemented
- Are security policies consistent across locations

## Technology Governance

- Are IT standards documented across locations
- Is there a hardware lifecycle policy
- Are software deployment practices standardized

## Team Onboarding

- How quickly can new staff receive system access
- Are teams trained on standardized systems
- Is IT support accessible for newly integrated locations
